

# Rohan Banerjee

Address: 349 Gates Hall, 107 Hoy Road, Cornell University, Ithaca, NY 14853

Phone: (703)-743-4178 E-Mail: rbb242@cornell.edu

## EDUCATION

---

### Cornell University

Ph.D. Student, Computer Science, GPA: 3.92/4.0

Ithaca, NY

September 2020 – present (expected: September 2025)

*Relevant Coursework:* Robot Manipulation, Machine Learning Theory, Deep Probabilistic and Generative Models, Matrix Computations

### Massachusetts Institute of Technology (MIT)

M.Eng. in Electrical Engineering and Computer Science, GPA: 4.5/5.0

S.B. in Electrical Engineering and Computer Science, GPA: 4.9/5.0

Cambridge, MA

June 2019

June 2018

*Relevant Coursework:* Statistical Learning Theory and Applications, Robotics: Science and Systems, Bayesian Modeling and Inference, Machine Learning, Inference and Information, Design and Analysis of Algorithms, Computational Cognitive Science, Discrete-Time Signal Processing, Elements of Software Construction, Computation Structures

### Thomas Jefferson High School for Science and Technology

SAT: 2400, GPA (weighted): 4.538/4.0

Alexandria, VA

September 2010 – June 2014

*Relevant Coursework:* Artificial Intelligence, Parallel Computing

## RESEARCH EXPERIENCE

---

### Cornell University

Ph.D. Student

Ithaca, NY

September 2020 – present

- Principal Investigator: Prof. Mark Campbell
- Conducting research as a member of the ASL (Autonomous Systems Laboratory) group
- Research area: Developing reinforcement learning (RL) algorithms for the autonomous navigation domain that are robust to variations in the surrounding environment

### Massachusetts Institute of Technology

Research Engineer

Cambridge, MA

June 2019 – June 2020

- Conducted research as a member of the DRL (Distributed Robotics Laboratory) group at CSAIL (Computer Science and Artificial Intelligence Laboratory)
- Refined autonomous driving simulation platform based on CARLA open-source driving simulator
- Validated research algorithms in simulation for vehicle navigation, dynamic obstacle avoidance, and end-to-end learning
- Supported research in language understanding and human-robot interaction involving the Toyota Human Support Robot platform

### Massachusetts Institute of Technology

M.Eng. Researcher

Cambridge, MA

March 2018 – June 2019

- Principal Investigator: Prof. Daniela Rus
- Conducted research as a member of the DRL (Distributed Robotics Laboratory) group at CSAIL (Computer Science and Artificial Intelligence Laboratory)
- Thesis Title: "Development of a Simulation-Based Platform for Autonomous Vehicle Algorithm Validation"
- Developed autonomous vehicle simulation platform based on CARLA open-source driving simulator
- Investigated learning algorithms for LIDAR-based rural road detection

### Massachusetts Institute of Technology

UROP (Undergraduate Research Opportunities Program)

Cambridge, MA

November – December 2017

- Principal Investigator: Prof. Jonathan How
- Conducted research as a member of the ACL (Aerospace Controls Laboratory) group
- Contributed to the development of a tripod-based sensor platform for pedestrian localization and intention recognition
- Calibrated webcams and LIDAR (Velodyne VLP-16), and investigated power management options for tripod platform

Updated: Fall 2022

# Rohan Banerjee

Address: 349 Gates Hall, 107 Hoy Road, Cornell University, Ithaca, NY 14853

Phone: (703)-743-4178 E-Mail: rbb242@cornell.edu

## Massachusetts Institute of Technology

*SuperUROP Advanced Undergraduate Research Program*

Cambridge, MA

September 2016 – May 2017

- Principal Investigator: Dr. Jim Glass
- Conducted research as member of the SLS (Spoken Language Systems) group at CSAIL (Computer Science and Artificial Intelligence Laboratory)
- Contributed to the development of a conversational robotic system that can acknowledge speaking subjects
- Converted offline Voice Activity Detector module into real-time streaming module
- Researched techniques for integrating visual face detection and audio source localization

## George Mason University

*Applied Mathematics Intern, Aspiring Scientists Summer Internship Program*

Fairfax, VA

June – August 2012, June – August 2013

- Principal Investigator: Prof. Padmanabhan Seshaiyer
- Developed MATLAB simulation of 1D Euler-Bernoulli Beam PDE system (2012); Modeled deformation of 2D membrane PDE system in COMSOL (2013)
- Simulated lung tissue fluid-structure interaction in MATLAB and developed lung tissue edge detection Python program: Pneumothorax Modeling and Diagnosis (2012)

## THESES

---

R. Banerjee, “Development of a Simulation-Based Platform for Autonomous Vehicle Algorithm Validation”. MIT, 2019.

## PUBLICATIONS

## INDUSTRY EXPERIENCE

---

### Autoliv (now Veoneer)

*Intern, Advanced Sensing Group*

Lowell, MA

June – August 2017

- Developed mapping algorithm for LIDAR data (Velodyne HDL-64) using point cloud registration to maintain coherent point cloud history and advance lane/object tracking algorithms
- Investigated mapping/registration techniques with lower-resolution (Velodyne VLP-32) LIDAR data to improve point cloud data resolution
- Investigated ego-motion estimation techniques with VLP-64 data to support vehicle localization

### Northrop Grumman

*Intern, Systems Integration, Test & Evaluation*

San Diego, CA

June – August 2016

- Supported Systems Integration, Test & Evaluation for the Triton UAV (Unmanned Aerial Vehicle) program

# Rohan Banerjee

Address: 349 Gates Hall, 107 Hoy Road, Cornell University, Ithaca, NY 14853

Phone: (703)-743-4178 E-Mail: rbb242@cornell.edu

- Developed Python test automation script for Triton test-bench landing test
- Co-developed SQL database for automated processing of Triton System Test Requests
- Improved upon Excel database for tracking flight requirements and test points
- Researched test automation methods for future modular hot-bench

## NASA Goddard Space Flight Center

Greenbelt, MD

Intern, Mission Engineering and Systems Analysis Division

January 2015; June – August 2015; January 2016

- Contributed to the NICER (Neutron Star Interior Composition Explorer)/SEXTANT (Station Explorer for X-Ray Timing and Navigation) mission
- Updated 1PPS signal interrupt handler Linux kernel module for hardware timing and synchronization
- Co-developed simulator of bi-directional science and telemetry packet transmission with another intern

## HONORS AND AWARDS

---

### Intel International Science and Engineering Fair

Phoenix, AZ

Fourth Place in Category: Mathematical Sciences

May 2013

### Siemens Competition in Math, Science, and Technology

Atlanta, GA

Selected for Regional Finals at Georgia Tech for biophysics project

November 2012

## TEACHING EXPERIENCE

---

### Cornell University

Ithaca, NY

Teaching Assistant, Foundations of Artificial Intelligence (CS 4700)

February – May 2021

- Developed problem set and exam questions
- Recognized by Prof. Haym Hirsh at Cornell CS Student Recognition Event (May 2021)

### Cornell University

Ithaca, NY

Teaching Assistant, Introduction to Machine Learning (CS 4780)

September – December 2020

- Developed problem sets in coordination with undergraduate TAs
- Conducted office hours to assist students with concepts and problem sets

### Massachusetts Institute of Technology

Cambridge, MA

Teaching Assistant, Introduction to Probability (6.041/6.431)

September – December 2018, February – May 2018

- Taught weekly tutorial problem-solving sessions to small student groups
- Conducted office hours to assist students with concepts and problem sets

### Massachusetts Institute of Technology

Cambridge, MA

Lab Assistant, Introduction to Electrical Engineering and Computer Science I (6.01)

February – May 2015

- Assisted students with in-class Software Labs and engineering Design Labs

## PROJECTS

---

### Generating Simulated Environments for 2D Path Planning Using Deep Conditional Generative Models

Ithaca, NY

Class Project, Deep Probabilistic and Generative Models (CS 6783)

February 2021 – May 2021

- Explored the application of deep generative models to the problem of generating simulated 2D map environments
- Experimented with conditional variational autoencoder (CVAE) and PixelCNN architectures on a synthetic 2D dataset

### 3D Point Cloud Clustering Using Small-Variance Asymptotics

Cambridge, MA

Class Project, Bayesian Modeling and Inference (6.882)

March 2018 – May 2018

- Explored Bayesian non-parametric clustering of 3D point cloud data using small-variance asymptotics approximate inference algorithms
- Implemented Kulis and Jordan (2012) small-variance asymptotics algorithm for DP-GMM and Straub et al. (2015) algorithm for DP-VMF-MM in Python

# Rohan Banerjee

Address: 349 Gates Hall, 107 Hoy Road, Cornell University, Ithaca, NY 14853

Phone: (703)-743-4178 E-Mail: rbb242@cornell.edu

## MIT Unmanned Aerial Vehicle Team

*Student Participant*

Cambridge, MA

September 2014 – September 2017

- Developed refined 2D simulator of competition arena and agent dynamics for the International Aerial Robotics Competition as simulation team lead
- Managed development of computer vision gridline and circle detection Python programs as computer vision team lead
- Co-developed Python simulator of competition arena and contributed to UAV path planning algorithms as member of artificial intelligence team

## SKILLS

---

**Programming Languages:** Python, MATLAB, C++, Java, C, HTML, LaTeX

**Frameworks/Libraries:** PyTorch, ROS, Scikit-learn
